Performance Electrical Contracting (PEC), a Jacksonville-based electrical contractor and infrastructure services provider, has announced the purchase and expansion of its new headquarters, marking a significant milestone in the company's continued growth and investment in the local community.

Recently recognized on the Jacksonville Business Journal Fast 50 list with 48% growth, PEC is expanding from a 2,500-square-foot office into a 20,000-square-foot facility on more than an acre in the former Bernie's Tool & Fastener building in the Lackawanna area. The new headquarters provides the space needed to support a growing team, expanded fleet, and increasing project volume, while enhancing the company's ability to serve customers across the region.

"This expansion is a direct reflection of the momentum we've built and where we're headed," said Mark Asselin, President of Performance Electrical Contracting Inc. "Jacksonville has been a big part of our story, and we're excited to keep growing here."

More than a physical move, the new headquarters represents PEC's long-term commitment to Jacksonville and the surrounding community. As the company continues to grow, its focus remains on delivering high-quality service, building lasting relationships with customers, and investing in the people and organizations that make up the community it serves.

"For us, it's not just about growing the business," Asselin added. "We genuinely care about this community and take pride in giving back and supporting the people and organizations around us. This space gives us the room to do that the right way—for our team, our customers, and the community."

The expansion also aligns with the continued evolution of PEC's services, including the launch of Performance Climate Solutions (PCS), a division focused on HVAC and climate control solutions for residential, multifamily, and light commercial properties. Introduced last year, PCS expands PEC's capabilities beyond traditional electrical contracting, allowing the company to better support customers with more integrated building solutions.

Looking ahead, PEC plans to build on this momentum through expanded service offerings, continued growth in PCS, and ongoing investment in its team, operations, and infrastructure.

As Performance Electrical Contracting continues to scale, its focus remains on sustainable growth, operational excellence, and creating long-term value for its customers and the Jacksonville community.
